Folks with respect to your good self and without stating the obvious on license delay etc etc my own behalf can I add the following " that any objection lodged on behalf of any group or organisations to an aquaculture application must have the name, time , date of where and when that organisation passed that objection motion and that the objection be signed by the chairperson and secretary. As to date quite a lot of people reporting to represent environmental groups are doing so under the guise of so called pillars and using this guise for their own personal grievance against aquaculture or agencies involved in aquaculture. Lastly I am sure some one of our EU partners have and do have systems in place that we can replicate in dealing with sac, spa's and with natura 2000 and that all relevant dg's in Brussels except mise Kevin Flannery
